## PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in building **machine learning, generative AI, computer vision, natural language processing, and data analytics solutions**. Proficient in **Python, SQL, Pandas, Scikit-learn, LangChain**, and **Streamlit**, with project experience in predictive modeling, natural language SQL generation, RAG, and sports analytics. Developing expertise in **AI/ML**, data science, **LLM applications**, and scalable data processing workflows.

## WORK EXPERIENCE

### Data Analyst Intern | Internship

CS Infocomm Private Limited

Jan 2026 - Apr 2026  
On-site • Mumbai, Maharashtra

- Processed and analyzed **50,000+** customer interaction records to identify trends in customer behavior, agent performance, and call outcomes.
- Developed and optimized machine learning models, achieving **87% prediction accuracy** for call outcome prediction.
- Designed and implemented data validation and quality-check frameworks, reducing inconsistent records and improving dataset reliability for analytics and reporting.
- Generated actionable insights through statistical analysis and visualization, supporting data-driven decision-making and operational efficiency improvements.

**Technologies / Skills Used :** Python, Pandas, EDA, NumPy, SciKit Learn, Tensorflow, Pytorch, Streamlit

## PROJECTS

### GenAI Data Analyst

GenAI developer/Python Developer

Jun 2026 - Aug 2026

- Built a **GenAI-powered BI platform** enabling natural-language querying of CSV/Excel datasets using LLM-based Text-to-Code generation with Pandas and SQL.
- Implemented automated data profiling, visualization generation, anomaly detection, forecasting, and **AI-powered business insight summarization**.
- Integrated RAG with embeddings and vector search for context-aware document analysis and conversational follow-up queries, deployed through **Streamlit**.

**Technologies / Tools Used :** Python, Pandas, SQLite, Gemini API, LangChain, FAISS, Scikit-learn, Streamlit, Git/github, RAG

### SQL Query Generator using Natural Language | GitHub

Generative AI Developer

May 2026 - Jun 2026

- Developed an **NL-to-SQL system** for the 11-table Chinook SQLite database, converting natural-language questions into executable SQL queries.
- Achieved **90% SQL generation accuracy** and **95% execution accuracy** across **50+** natural-language queries, with schema-aware prompting and SQL-agent configuration improving query reliability by **30%**.

**Technologies / Tools Used :** Python, LangChain, SQL, Streamlit, Gemini API

### Re-identification for Sports Analytics | GitHub

AI/ML Developer

Dec 2025 - May 2026

- Developed a computer vision pipeline using **YOLO** to detect and track **20+ objects** per frame, maintaining consistent identities across occlusions and re-entries.
- Improved tracking stability and re-identification accuracy through model tuning and feature matching techniques, supporting reliable **real-time sports analytics**.

**Technologies / Tools Used :** Computer Vision, YOLO, Python, Ultralytics, RoboFlow, OpenCV, tensorflow

## SKILLS

|                                     |                                                                                                                                               |
|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Databases :</b>                  | MySQL, MongoDB (Basics), CSV based data management                                                                                            |
| <b>Frameworks &amp; Libraries :</b> | Pandas, Scikit-learn, Matplotlib, Seaborn, Power BI, XGBoost, PyTorch, Ultralytics, numpy, OpenCV, Streamlit, LangChain, DeepSORT, TensorFlow |
| <b>Languages :</b>                  | English, Hindi, Marathi                                                                                                                       |
| <b>Programming Languages :</b>      | Python, SQL, R                                                                                                                                |
| <b>Soft Skills :</b>                | Presentation Skills, Team Work, Problem Solving, Adaptability, Logical reasoning                                                              |
| <b>Tools &amp; Platforms :</b>      | FastAPI, Streamlit, AWS, GCP, Azure, Git, Jupyter, Google colab, spark, BigQuery                                                              |

## EDUCATION

### MIT School Of Computing | Pune, Maharashtra

Bachelor of Technology - Computer Science Engineering(AI and Analytics)

Sep 2022 - May 2026

- Bachelor of Technology in Computer Science Engineering** with specialization in **AI and Analytics**

## CERTIFICATIONS

- IBM** Introduction to Machine Learning (4 courses)
- AWS** Academy Graduate - Cloud Foundations
- Databricks** Fundamentals Accreditations
- IBM** AI Foundations for Business
- IBM** Introduction to Business Analysis

## AWARDS & ACHIEVEMENTS

- Secured **2nd place** among **600 teams** in an internal hackathon and qualified for the Smart India Hackathon (SIH) 2024.
- Re-identification for Sports Analytics project ranked among the **Top 5** projects at the college level in 2026.
